BUILDERS FILM

PRODUCT DESCRIPTION

Builders Film is created from Polyethylene sheet – sheet which is generated using high eminence recycled resins or new low-density polyethylene resins. Builders Film is of very low biodegradability, thus making this product perfectly suited for use as a pre-pour damp proof membrane or vapour obstruction.

Medium impact Builders Film is used in standard soil conditions. High Impact Builders Film is used in conditions where soil experiences significant movement.

ADVANTAGES

- Durable
- Tear resistant
- Provides a vapour barrier between slab and soil
- Prevents moisture from working its way through to slab
- Environmentally friendly as all wastage is fully recyclable

TEST RESULTS

- Film thickness complies with AS/NZS4347.9 requirements
- Medium Impact complies with AS4347.6 requirements
- High Impact complies with AS4347.6 requirements
- All Builders Film must be Polyethylene
- All Builders film grades conform to Australian Standard AS 2870 - 1996.

APPLICATIONS

- Concrete slab underlay
- Landscaping
- Dam lining
