

PRODUCT DESCRIPTION

Nevosafe-Plus Reinforced Caps are reinforced with steel thus providing a impalement protection for individual exposed rebar. Caps come in two sizes; caps suitable for rebar with diameters of 6mm – 20mm and caps suitable for rebar with diameters of 20mm – 36mm. The caps are reusable by special rib design and will grip the bar even when they are screwed onto a smaller bar than the one previously protected.

ADVANTAGES

- Reusable.
- Anti-impalement cap.
- Easy and quick to install.
- Weather and shock resistant plastic.
- Caps can be applied to different bar diameter.
- Secure and stable on different bar diameter.
- Available in high visible colour yellow.

APPLICATIONS

- Any exposed rebar of diameters between 6mm and 36mm.

TEST RESULTS

- Safety tested for 100kg falling from a height of 3m.
