

PRODUCT DESCRIPTION

Antifog safety glasses are built with an ultra thin, light weight temple. The temples have a rubber infill providing you with additional support when wearing glasses all day.

They are an easy to wear safety frame that provides medium impact protection.

Antifog safety glasses are certified by SAI Global to AS/NZS1337.1 Safety Glasses standards.

The design is available in both clear antifog and smoke antifog lens.

This design has been carefully moulded to provide you with distortion free lens. Using polycarbonate lens, they also provides you with UV protection and is ideal for all day wearing.

They are a full wrap-around style and can be easily worn with respirators and ear muffs.
