

Temperature taking has never been easier with the **Danterr** supplied non-contact infrared thermometer.

The thermometer provides convenience, accuracy and precision when taking a temperature.

With the push of a button, the thermometer instantly and accurately takes a person's temperature without the need of any physical contact. Simply point the thermometer at the patient's forehead, click "scan" and their temperature instantly will be displayed. The screen will be green when the measured temperature is between 36.3°C to 37.3°C. The screen will be orange when the measured temperature is between 37.4°C to 37.9°C. The screen will be red when the measured temperature is greater than 38°C.

It also comes equipped with three different temperature taking modes; body, room and surface temperature modes.
