

Bitumen Emulsion

High-Solids Bitumen Emulsion for Priming, Tack Coats & Waterproofing

Evencure EP Ezispray is a high-performance modified CRS-170 bitumen emulsion designed for versatility across multiple road and civil infrastructure applications. It delivers excellent substrate penetration, waterproofing protection, and trafficable durability — all without the need for heating or special spray equipment.

Suitable for primer sealing, tack coating, waterproofing, or concrete priming, this unique emulsion delivers enhanced stability, deeper penetration, and minimal surface pickup post-cure.

Key Features & Benefits

- ▶ Complies with state CRS-170 bitumen emulsion standards
- ▶ Can be sprayed without heating – suitable for gear pumps
- ▶ Forms a waterproof and trafficable coating
- ▶ Highly stable with minimal settlement in storage
- ▶ Penetrates deeper than traditional emulsions
- ▶ Reduced pickup post-curing
- ▶ Totally water-based and solvent-free
- ▶ No specialised pump or heater required
