

# Water Based XDS Curing Compound

## Next Generation Water Based Curing Compound

Evencure XDS NXGEN is a high-performance water based curing compound featuring a proprietary blend of hydrocarbon resins, surface hardeners, and densifiers. Designed for superior concrete curing, it achieves excellent moisture retention while enhancing surface strength and reducing dusting.

Formulated for both indoor and outdoor use, this next-generation solution begins to oxidise after 7 days and self-degrades under UV light within 45–55 days, minimising the need for post-application cleaning.

## Key Features & Benefits

- ▶ AS3799 compliant (≥90% water retention)
- ▶ Surface densifier improves abrasion and impact resistance
- ▶ Film oxidises after 7 days and breaks down in 45–55 days
- ▶ Wax-free formulation – suitable for most finishes
- ▶ Reduces plastic shrinkage and surface dusting
- ▶ One-coat application
- ▶ Can be removed with ConClena degreaser if required
- ▶ Available in Clear, White, and Red Fugitive Dye types
- ▶ Equipment cleans with water

### SPECIFICATIONS:

Product Code	Description	Pack Qty
101682	Evencure XDS Water Based Curing Compound 20L	1
101681	Evencure XDS Water Based Curing Compound 200L	1
101680	Evencure XDS Water Based Curing Compound 1000L	1
