

Futureflex™ Rolls

Durable Non-Woven Geotextile for Ground Stability

FutureFlex™ by Danter is a high-performance closed-cell polyethylene foam ideal for expansion joint filling in concrete construction. Offered in convenient roll form, this compressible foam is engineered to resist water absorption, environmental stress, and degradation under extreme conditions.

It is available in standard heights from 75mm to 300mm, with custom sizing on request, and is supplied in 25m coils (10mm thickness) and 15m coils (20mm thickness). With both adhesive and non-adhesive backing options, FutureFlex™ is a versatile, long-lasting solution for both vertical and horizontal joints.

Key Features & Benefits

- ▶ **Waterproof & Non-Absorbent:** Excellent performance in submerged or damp environments
- ▶ **Compressible & Flexible:** Easily fits irregular surfaces while recovering after load release
- ▶ **Easy On-Site Handling:** Simple to cut and place for quick installation
- ▶ **Thermally Stable:** Operates across a wide range of temperatures
- ▶ **10mm Zip Edge:** Perforated edge allows easy removal post-installation for sealant prep
- ▶ **Customisable Sizing:** Accommodates specific slot widths for joint sealing
- ▶ **Meets AU/NZ Standards:** Complies with local concrete expansion regulations
