

# Aardcure BPP – Bitumen Curing Compound

## High-Performance Bitumen Emulsion for Curing & Priming

Aardcure BPP is a dual-purpose bitumen emulsion curing agent engineered to cure freshly poured concrete and prime surfaces for asphalt overlays. This water-based, solvent-free emulsion complies with AS3799, forming a durable film that minimizes moisture loss and enhances surface bonding.

With high solids content and proven CRS-170 performance, Aardcure BPP is ideal for roadworks, bridge decks, slabs, and civil infrastructure projects. Its cationic nature ensures strong adhesion, while its black finish provides visual confirmation of coverage.

### SPECIFICATIONS:

| Product Code | Description        | Size  |
|--------------|--------------------|-------|
| 132959       | Aardcure BPP (BCP) | 20L   |
| 133170       | Aardcure BPP (BCP) | 200L  |
| 133171       | Aardcure BPP (BCP) | 1000L |

## Key Features & Benefits

- ▶ AS3799 compliant – ≥90% water retention
- ▶ Dual function – curing compound and asphalt primer
- ▶ Cationic bitumen emulsion formulation
- ▶ Excellent bond strength to asphalt overlays
- ▶ No wax content – minimal residue
- ▶ Eliminates need for water ponding or hessian
- ▶ Suitable for brush, roller, or spray application
- ▶ Easy equipment cleanup with water
