

Aardcure WAX – Wax-Based Concrete Curing Compound

AS3799-Compliant Wax Membrane for Concrete Curing and Moisture Retention

Aardcure WAX is a wax based concrete curing compound formulated to meet the highest standards for moisture retention in fresh concrete. Engineered as a white pigmented, water-based wax emulsion, it creates a uniform film that reflects solar radiation and significantly reduces plastic shrinkage and cracking.

This AS3799-compliant curing membrane is ideal for pavements, roadways, large concrete slabs, and other high-exposure applications. Its white pigment aids in coverage visibility and temperature control, making it perfect for outdoor use in warm conditions.

Key Features & Benefits

- ▶ AS3799 compliant – >90% water retention
- ▶ White pigmented – reduces surface temperatures
- ▶ Wax-based membrane – high performance for horizontal slabs
- ▶ Water-based formula – easy to apply and clean
- ▶ Reduces shrinkage and cracking
- ▶ Reflective coating enhances curing efficiency
- ▶ Sprayable through standard equipment
- ▶ Quick-drying and non-staining

SPECIFICATIONS:

Product Code	Description	Size
132960	Aardcure Wax	20L
132863	Aardcure Wax	200L
133169	Aardcure Wax	1000L
