

## High-Performance Curing Compound and Surface Densifier in One

Aardcure WHC is a premium curing compound and surface densifier formulated with hydrocarbon resin and specialty catalysts to deliver superior curing performance and long-term durability. It complies with AS3799, offering over 90% moisture retention while improving surface hardness, abrasion resistance, and chemical resistance.

The unique formula helps heal plastic shrinkage cracks during the curing phase and begins breaking down after 7 days—eliminating the need for post-application stripping in many cases. Aardcure WHC is ideal for slabs requiring both curing and enhanced surface integrity in one easy-to-apply product

## Key Features & Benefits

- ▶ Complies with AS3799 – >90% moisture retention
- ▶ Curing agent + densifier – two-in-one solution
- ▶ Increases surface durability, impermeability, and impact resistance
- ▶ Heals plastic shrinkage cracks during curing
- ▶ Reduces surface dusting and improves abrasion resistance
- ▶ Starts oxidising after 7 days – no stripping needed
- ▶ Available in Type 1 (Clear), Type 1-D (Fugitive dye), and Type 2 (White)
- ▶ One-coat application by spray or roller
- ▶ Suitable for indoor/outdoor and all concrete finishes

### SPECIFICATIONS:

Product Code	Description	Size
133150	Aardcure WHC (XDS)	20L
133165	Aardcure WHC (XDS)	200L
133166	Aardcure WHC (XDS)	1000L
