

Builders Film

High-Performance Vapour Barrier for Slab Protection and Site Versatility

Builders Film is a high-quality polyethylene membrane engineered to deliver effective moisture and vapour protection across a range of construction environments. Available in medium-impact and high-impact grades, this durable sheet provides a reliable barrier between concrete slabs and soil, reducing the risk of dampness, ground vapour intrusion, and structural degradation.

Manufactured in accordance with Australian Standard AS2870, Builders Film is supplied in black or orange, and offers UV stability, tear resistance, and eco-conscious composition through the use of recycled polyethylene.

SPECIFICATIONS:

Product Code	Description	Grade
104886	Builders Film Polythene Membrane 4m x 50m x 200um High Impact Orange	High Impact
101516	Builders Film Polythene Membrane 4m x 50m x 200um Medium Impact Orange	Medium Impact
116689	Builders Film Polythene Membrane 4m x 50m x 200um High Impact Black	High Impact
101514	Builders Film Polythene Membrane 4m x 50m x 200um Medium Impact Black	Medium Impact

Key Features & Benefits

- ▶ Conforms to AS2870, AS4347.6 & AS4347.9
- ▶ Provides reliable vapour and moisture barrier
- ▶ Available in medium or high-impact strength
- ▶ Tear-resistant and puncture-resistant
- ▶ UV-stabilised for above-ground temporary coverage
- ▶ Fully recyclable – eco-friendly production
- ▶ Easy to install with standard overlaps and taping
- ▶ Suitable for use as slab underlay, dam lining, or floor protection
