

# Concrete Rail Spacers - Square

## Durable Precision for High-Load Concrete Applications

The Concrete Rail Spacer – Square is a high-strength, fibre-reinforced spacer designed to maintain consistent cover in heavy-duty concrete applications. Its stable square profile suits walls, slabs, and beams, offering reliable grip and alignment. Available in 20mm to 75mm sizes and up to 1000mm lengths, it meets AU/NZ standards for civil and precast projects.

## Key Features & Benefits

- ▶ **Fibre-Reinforced Concrete:** Ensures high load capacity and crack resistance
- ▶ **Square Profile Design:** Provides secure grip and alignment in formwork
- ▶ **Consistent Concrete Cover:** Maintains exact spacing across large slabs
- ▶ **Resilient to Harsh Environments:** Withstands extreme load, moisture, and chemical exposure
- ▶ **Versatile Use:** Ideal for slabs, walls, beams, and precast elements
- ▶ **Compliance:** Meets AU/NZ standards for reinforced concrete applications
- ▶ **Variety of Sizes:** From 20mm to 75mm to suit project-specific needs
- ▶ **Efficient Application:** Enables fast, secure placement in civil works

## SPECIFICATIONS:

Product Code	Description
118890	Concrete Rail Spacer Square 50mm x 330mm
132532	Concrete Rail Spacer Square 60mm x 330mm
132913	Concrete Rail Spacer Square 70mm x 330mm
112982	Concrete Rail Spacer Square 20 x 1000mm
112983	Concrete Rail Spacer Square 25 x 1000mm
112984	Concrete Rail Spacer Square 30 x 1000mm
112985	Concrete Rail Spacer Square 30–40 x 1000mm
112986	Concrete Rail Spacer Square 35 x 1000mm
112987	Concrete Rail Spacer Square 40 x 1000mm
112988	Concrete Rail Spacer Square 40–50 x 1000mm
103632	Concrete Rail Spacer Square 45 x 1000mm
112989	Concrete Rail Spacer Square 50 x 1000mm
112990	Concrete Rail Spacer Square 55 x 1000mm
112991	Concrete Rail Spacer Square 60 x 1000mm
112992	Concrete Rail Spacer Square 70 x 1000mm
112993	Concrete Rail Spacer Square 75 x 1000mm
