

Panel Chairs Bar Chair

Durable, Stable & Invisible Support for Precast Reinforcement

The Panel Chairs Bar Chair is a durable, four-legged plastic chair designed to maintain accurate reinforcement placement in tilt-up, precast, and suspended concrete slabs. Its clip-on feature ensures fast installation, while pointed legs reduce marking and visibility on the concrete surface.

Tested to comply with AS/NZS 2425:2015, this versatile bar chair is suited to mesh and bar applications, supporting reinforcement firmly without tipping or shifting during formwork setup.

Key Features & Benefits

- ▶ **Four-Leg Stability:** Prevents tipping under load
- ▶ **Clip-On Mechanism:** Swings into place when lowering mesh
- ▶ **Invisible Finish:** Pointed legs reduce concrete surface marking
- ▶ **Works with All Mesh Sizes:** Including Y12 bars
- ▶ **Tested to AS/NZS 2425:2015**
- ▶ **Ideal for Precast, Tilt-Up & Suspended Slabs**
