

Combination SOG Bar Chair Cliptop

Dual-Height Clip-On Spacers for Fast Mesh Placement in Slab-on-Ground Applications

The Combination SOG Bar Chair Cliptop is a purpose-built, dual-height plastic reinforcement spacer designed to simplify slab-on-ground construction. Featuring a Cliptop system, it allows the chair to be secured to reinforcement mesh while on the ground, which then swings underneath as the mesh is lifted into place. This design reduces manual chair placement and supports membrane integrity by avoiding puncture. Tested to AS/NZS 2425:2015, these spacers are rust-proof and stackable for efficient use on large-scale commercial

SPECIFICATIONS:

Product Code	Description
101459	Bar Chairs Combination SOG Cliptop 50/65 (100Pk)
101461	Bar Chairs Combination SOG Cliptop 75/90 (100Pk)
124458	Bar Chairs Combination SOG Cliptop 25/40 (100Pk)
125493	Bar Chairs Combination SOG Cliptop 85/100 (100Pk)

Key Features & Benefits

- ▶ Cliptop Design: Pre-attach chairs to mesh, then lift into position
- ▶ Dual Cover Heights: Provides flexibility in slab reinforcement
- ▶ Rust-Proof: Manufactured from selected recycled plastics
- ▶ Lightweight & Stackable: Easy to transport and install
- ▶ Membrane Safe: Won't puncture polymer underlays
- ▶ AS/NZS 2425:2015 Tested
