

Fast Clip Bar Chairs

PRODUCT DESCRIPTION

Danterr's Fast Clip Bar Chairs are advanced clip-on bar chairs crafted for use with 4mm to 20mm diameter rebar in both on-site and precast concrete settings. Designed for speed, accuracy, and traceability, these plastic rebar chairs feature a sturdy four-legged base and a fast, secure clip-on mechanism.

Each chair is rust-proof and injection-moulded from durable plastic, making it ideal for precast and tilt-up panels, suspended slabs, beams, and walls. These spacers are fully AS/NZS 2425 bar chair compliant.

FEATURES & BENEFITS

- Clip-on head fits 4mm–20mm bar securely
- Built-in four-legged cross base ensures balance on mesh and rebar
- Rust-proof plastic – ideal for exposed and damp conditions
- Minimal footprint for reduced visibility in architectural concrete
- Fast, tool-free installation on-site or in factories
- Fully recyclable and compliant with AS/NZS 2425

APPLICATIONS

- Precast concrete panels and tilt-up systems
- Suspended decks, beams, and structural walls
- Reinforcement positioning in slab-on-ground and suspended pours
- Concrete panels in civil and commercial projects.
- Steel fixing bar chair solution for tight-tolerance installations
