

# Backing Rod Closed Cell

## Reliable Joint Support with Closed Cell Foam Backing Rod

Danter's Closed Cell Backing Rod range is designed to provide reliable joint backing for cold-applied sealants in expansion and construction joints. We offer two distinct options tailored to project needs: a high-performance polyolefin foam rod available in 6mm x 250m (Sekisui Australia), and a versatile polyethylene foam rod covering sizes from 13mm x 100m up to 40mm x 2m (Thermotec Australia). Both options are compressible, durable, and resistant to water and chemicals, ensuring the correct joint geometry, reducing sealant consumption, and preventing unwanted adhesion to joint bases.

## Key Features & Benefits

- ▶ **Closed Cell Structure** – Prevents moisture absorption for enhanced reliability.
- ▶ **Excellent Dimensional Stability** – Maintains performance in varied joint sizes.
- ▶ **Chemical Resistant** – Suitable for harsh environments.
- ▶ **Non-Toxic & Odourless** – Safe and user-friendly.
- ▶ **Rot Proof & Durable** – Ensures long service life.
- ▶ **Easy to Install** – Flexible, compressible design allows for snug fitting.
- ▶ **Compliance** – Meets Australian and New Zealand standards.
- ▶ **Reduced Sealant Use** – Promotes optimal sealant shape, saving material costs.

## SPECIFICATIONS:

Product Code	Description	Size
106237	Backing Rod Closed Cell	6mm x 250m White
113091	Backing Rod Closed Cell	10mm x 200m White
112734	Backing Rod Closed Cell	13mm x 100m White
113696	Backing Rod Closed Cell	15mm x 100m White
102155	Backing Rod Closed Cell	20mm x 60m White
106239	Backing Rod Closed Cell	25mm x 50m White
101502	Backing Rod Closed Cell	30mm x 50m White
110166	Backing Rod Closed Cell	40mm x 2m White
108054	Backing Rod Closed Cell	50mm x 2m White
