

Bostik Seal N Flex® FC

Fast Cure Polyurethane Construction Sealant for Durable, Flexible Joints

Bostik Seal N Flex® FC is a high-performance, fast cure polyurethane sealant engineered for demanding construction environments. This one-component, moisture-curing Bostik polyurethane sealant delivers strong adhesion, excellent flexibility, and long-lasting durability across multiple substrates. Designed for construction and expansion joints, it provides superior resistance to weather, chemicals, and aging—making it the go-to polyurethane construction sealant for contractors who need reliability, speed, and compliance on-site.

Key Features & Benefits

- ▶ **Fast Cure Technology** – Tack-free and fully cured quicker than standard sealants, saving valuable project time.
- ▶ **Superior Flexibility** – Handles $\pm 25\%$ to $\pm 50\%$ joint movement without cracking or loss of adhesion.
- ▶ **High Bond Strength** – Reliable adhesion to a wide range of construction materials, including concrete, GRC, fibreglass, plasterboard, and cladding.
- ▶ **Durability & Resistance** – Withstands extreme weather, UV, aging, hydrolysis, and many chemicals.
- ▶ **Acoustic & Pick Resistance** – Supports soundproofing requirements and offers durability in high-traffic or tamper-prone areas.
- ▶ **Potable Water Approved** – Certified for sealing potable water tanks.
- ▶ **Australian Made** – Locally manufactured to meet Australian construction standards.
