

Fire Rated IBS Foam

Fire Rated Expansion Joint Foam for Reliable Passive Fire Protection

Promaseal® IBS Foam Strip is a fire rated expansion joint foam designed to maintain the integrity of fire-rated structures. Manufactured from high-density, flexible foam, it is engineered to close joints in walls and floors where low movement is expected but fire resistance is critical. Tested to Australian standards, Promaseal® IBS is widely used in passive fire protection systems for commercial, industrial, and infrastructure projects.

Key Features & Benefits

- ▶ **Fire Rated Performance** – Tested to AS 1530.4 for fire resistance in joints
- ▶ **Flexible & Easy to Install** – Compressible foam strip adapts to a variety of joint sizes
- ▶ **Durable & Long-Lasting** – Resistant to ageing, shrinkage, and deterioration under site conditions
- ▶ **Non-Hazardous Composition** – Classified as non-hazardous under Safe Work Australia criteria
- ▶ **Lightweight Roll Form** – Supplied in convenient roll lengths for ease of handling and application
- ▶ **Engineered for Safety** – Complements Promat's passive fire protection systems, supporting compliance with NCC fire performance requirements

SPECIFICATIONS:

SKU	Product Description	Size / Roll Length
113873	Foam Strip Promaseal IBS	22mm × 100m Roll
118451	Foam Strip Promaseal IBS	29mm × 60m Roll
118452	Foam Strip Promaseal IBS	38mm × 30m Roll
118706	Foam Strip Promaseal IBS	16mm × 150m Roll
120400	Foam Strip Promaseal IBS	50mm × 20mm × 50m
121605	Foam Strip Promaseal IBS	100mm × 10mm × 50m
