

Fulaflex® 650FC Sealant

Hybrid Polymer Construction Sealant for Flexible, Durable, and Sustainable Joints

Fulaflex 650FC is a premium solvent free hybrid polymer sealant that delivers outstanding adhesion, flexibility, and durability across multiple substrates. Designed for construction and industrial joints, it is a UV resistant, high modulus sealant that withstands movement, weather, and vibration. A safe and sustainable alternative to traditional products, this solvent free silicone sealant ensures reliability and compliance on every project.

Key Features & Benefits

- ▶ **Solvent free sealant** – safe, sustainable, and GHS non-hazardous
- ▶ **Superior flexibility** – handles $\pm 25\%$ joint movement without cracking
- ▶ **High modulus sealant** – strong mechanical stress resistance
- ▶ **UV resistant sealant** – excellent colour stability and weathering performance
- ▶ **Strong adhesion** – bonds securely to concrete, masonry, timber, metals, plastics, and more
- ▶ **Durability and resistance** – withstands vibration, impact, aging, hydrolysis, and many chemicals
- ▶ **Acoustic and pick resistance** – Shore A hardness ~ 55 , suitable for correctional facilities and public areas
- ▶ **Over-paintable** – compatible with most water- and solvent-based coatings (testing recommended)
- ▶ **Compliance assured** – meets ASTM C-920, ISO 11600, and AS3740-2021 waterproofing standards
