

Promaseal® Fyrestrip

Flexible Intumescent Expansion Joint Seal with Up to 4 hours Fire Resistance

PROMASEAL® FyreStrip is a highly compressible, flexible, fire-resistant expansion joint strip used to seal building movement joints in concrete and masonry floors and walls. Consisting of intumescent layers bonded to foam, it expands under fire conditions to maintain integrity and insulation, achieving up to 240 minutes of fire resistance depending on joint design and installation.

SPECIFICATIONS:

Product Code	Description
114761	PROMASEAL FyreStrip 1000mm x 120mm x 124mm
114866	PROMASEAL FyreStrip 1000mm x 90mm x 28mm
114908	PROMASEAL FyreStrip 1000mm x 90mm x 46mm
116910	PROMASEAL FyreStrip 1000mm x 90mm x 56mm
116996	PROMASEAL FyreStrip 1000mm x 100mm x 84mm

Key Features & Benefits

- ▶ Fire resistance: tested for up to 240 minutes in masonry and concrete floors/walls
- ▶ Flexible design accommodates building movement and a range of configurations
- ▶ Suitable for junctions between compartment floors and walls
- ▶ Easy to install, cut, and adjust to length
- ▶ Non-loadbearing but can be protected with cover plates in trafficable areas
- ▶ Available in multiple sizes to suit a range of joint widths
- ▶ Tested in accordance with AS 4072.1:2005 and AS 1530.4:2014
