

Sikaflex®-11 FC

Polyurethane Construction Sealant & Adhesive for Durable, Flexible Joints

Danterr's Sikaflex®-11 FC is a high-performance polyurethane adhesive sealant, engineered for demanding construction and industrial applications. This one-component, moisture-curing, polyurethane construction sealant delivers outstanding adhesion, long-lasting flexibility, and resistance to weathering and mechanical stress.

Designed to bond and seal across multiple substrates, including concrete, brick, wood, glass, and metals, Sikaflex®-11 FC is ideal for sealing joints, bonding lightweight materials, and ensuring reliable performance in both indoor and outdoor projects.

Key Features & Benefits

- ▶ **Dual Functionality** – Works as both a polyurethane construction sealant and adhesive
- ▶ **Superior Flexibility** – Withstands $\pm 12.5\%$ joint movement without cracking
- ▶ **Fast Cure Technology** – Tack-free in 1–2 hours; cures fully in 3–5 days
- ▶ **Excellent Durability** – Weather resistant and long-lasting, with high elastic recovery (>90%)
- ▶ **Broad Substrate Compatibility** – Bonds to cement-based materials, glass, wood, ceramics, and metals
- ▶ **Non-Corrosive & Safe** – Will not damage metals or concrete reinforcement
- ▶ **Paintable** – Compatible with most water-based coatings (testing recommended)
- ▶ **Potable Water Certified** – Approved for sealing water-retaining structures (NSF/ANSI/CAN 61)
