

# Galvanised Reinforcing Mesh

## Strength and Corrosion Resistance for Long-Term Concrete Reinforcement

Danterrr's galvanised mesh provides exceptional strength and corrosion resistance for reinforced concrete applications. Made from 500 MPa welded ribbed wire, each sheet of galvanised steel mesh is hot-dip zinc coated for long-term protection against rust and harsh weather. This durable gal mesh ensures structural reliability across foundations, slabs, and pavements. Ideal for civil, commercial, and industrial projects, galvanised reo mesh delivers lasting performance and cost-effective reinforcement.

## SPECIFICATIONS:

Product Code	Description	Dimensions
130874	Reo Mesh SL62 Gal	2400 mm × 6000 mm
118150	Reo Mesh SL72 Gal	2400 mm × 6000 mm
110242	Reo Mesh SL81 Gal	2400 mm × 6000 mm
110243	Reo Mesh SL82 Gal	2400 mm × 6000 mm
123687	Reo Mesh SL92 Gal	2400 mm × 6000 mm
118151	Reo Mesh SL102 Gal	2400 mm × 6000 mm

## Key Features & Benefits

- ▶ **Superior Corrosion Protection** – Hot-dip zinc coating shields against moisture, salts, and aggressive environments.
- ▶ **High Strength & Durability** – Made from 500 MPa welded ribbed wire for enhanced structural integrity.
- ▶ **Versatile Applications** – Ideal for slabs, pavements, bridges, retaining walls, and trench construction.
- ▶ **Cost-Effective Solution** – Reduces maintenance and repair costs through extended service life.
- ▶ **Proven Reliability** – Consistent performance under Australian conditions, from large-scale infrastructure to small-format builds.
