

# Tie Wire - Black

## Flexible & Reliable Binding for Reinforcement

Danterr's black tie wire is a must-have for construction sites, designed for flexibility, durability, and ease of use. Manufactured from fully softened low-carbon black annealed wire, this tie wire coil is supplied in 95 m handy rolls that are resistant to tangling and packed for use with or without a belt reel. With a 1.57 mm diameter, it provides the perfect balance of tensile strength and malleability, making it ideal for tying rebar, mesh, barrier mesh, and star pickets. Whether used as a rebar tie wire coil during concrete pours or for general site binding, Danterr's tie wire ensures reinforcement stays secure and in position.

## Key Features & Benefits

- ▶ **High Strength & Flexibility** – Easy to twist and knot without breakage.
- ▶ **Versatile Applications** – Perfect for tying rebar, mesh, star pickets, and barrier mesh during concrete pours.
- ▶ **Efficient & Cost-Effective** – Supplied in 95 m handy coils, resistant to tangling for easy use on site.
- ▶ **Secure Reinforcement** – Keeps bars, mesh, chairs, and spacers in position during pouring and curing.

## SPECIFICATIONS:

Product Code	Description
102593	Tie Wire Handy Coil 1.57mm x 95m – Black
P102593	Tie Wire Handy Coil 1.57mm x 95m – Black – Pallet Buy
