

# Tie Wire Galvanised

## Durable & Corrosion-Resistant Binding Solution

Danterr's galvanised tie wire is engineered for strength, flexibility, and long-term performance on construction sites. Manufactured from high-quality galvanised wire, each tie wire coil is corrosion-resistant, easy to handle, and designed to withstand Australia's harsh conditions. Supplied in handy 95 m coils, our gal tie wire fits seamlessly into reels for smooth, efficient dispensing on-site. With a 1.57 mm diameter, it's ideal for tying rebar, reinforcing mesh, bar chairs, and spacers, keeping reinforcement secure during concrete pours and structural works. This versatile metal wire is a reliable, cost-effective choice for civil, commercial, and general construction tying tasks.

## Key Features & Benefits

- ▶ **Corrosion Resistant** – Hot-dip galvanised coating protects against rust and extends service life.
- ▶ **Strong & Durable** – Made from robust galvanised steel wire for dependable on-site performance.
- ▶ **Easy Handling** – Supplied in 95 m handy coils that fit reels for fast, tangle-free use.
- ▶ **Versatile Applications** – Perfect for tying reinforcement mesh, rebar, bar chairs, and other site accessories.
- ▶ **Reliable Support** – Keeps reinforcement securely in place during concrete pours and structural works.
