

Tie Wire Stainless Steel

High-Strength, Corrosion-Resistant Stainless Wire

Danterr's stainless steel tie wire is engineered for strength, flexibility, and superior corrosion resistance, making it the ideal choice for demanding environments. Manufactured from premium 304 and 316 grades of stainless steel wire, it resists rust, saltwater, chemicals, and extreme temperatures while maintaining excellent tensile strength. Available in 9m length, our tie wire stainless is supplied in easy-to-handle handy coils for construction, marine, agricultural, and industrial use. From tying rebar on-site to building fencing or handling marine rigging, this versatile metal wire provides long-lasting reliability and performance.

Key Features & Benefits

- ▶ **Superior Corrosion Resistance** – Withstands saltwater, chemicals, and harsh weather.
- ▶ **Strong & Flexible** – High tensile strength allows secure knots and long-term durability.
- ▶ **Versatile Applications** – Suitable for rebar fixing, fencing, scaffolding, signage, and marine rigging.
- ▶ **Easy to Use** – Soft, malleable finish for quick tying and reliable binding.
