

Zemfrasa

Reusable CPF Liner for High-Quality Concrete Finishes

Zemfrasa is a reusable CPF liner created to improve concrete surface quality by controlling moisture at the formwork interface. Its polypropylene (PP) membrane and PP grid release excess water and air, helping deliver dense and uniform surfaces with reduced blowholes. The self-adhesive grid supports fast installation across steel and plastic formwork, including curved and complex shapes. Zemfrasa may be reused two or three times when installed within recommended temperature conditions.

Key Features & Benefits

- ▶ Reusable CPF liner that supports 2-3 pours
- ▶ Smooth to lightly structured finish on the concrete side
- ▶ Structured PP grid with pressure-sensitive adhesive for fast positioning
- ▶ Suitable for steel and plastic formwork
- ▶ Reduces blowholes and surface laitance
- ▶ Helps achieve dense and consistent concrete finishes

SPECIFICATIONS:

Product Code	Description	Pack Qty
113061	Zemfrasa Self-Adhesive 2.5 m × 35.0 m Roll	1
