

Formply

Structural Plywood for Commercial & Civil Formwork

Formply is an F17 stress-graded structural plywood panel manufactured from all-hardwood sustainable plantation Eucalyptus. Designed for commercial and civil concrete formwork, it delivers strength, durability and consistent performance across demanding construction environments. Manufactured under certified quality control systems to AS/NZS 2269.0:2008 and AS6669-2007, Formply provides dependable structural integrity and dimensional accuracy.

Key Features & Benefits

- ▶ **F17 Structural Rating** – Reliable load capacity for slab, wall and beam formwork.
- ▶ **All Hardwood Construction** – Strong, rigid and dimensionally stable plywood.
- ▶ **Moisture Resistance** – Reduced risk of swelling or contraction under site conditions.
- ▶ **Consistent Finish Quality** – Supports Class 2 and Class 3 concrete finishes.
- ▶ **Dimensional Accuracy** – Manufactured to strict tolerances for accurate set-out.
- ▶ **Water-Resistant Edge Sealing** – Grey coating helps limit moisture ingress.

SPECIFICATIONS:

Product Code	Description	Sheets per pack
101901	F17 1800mm x 1200mm x 17mm	40
109240	F17 2400mm x 1200mm x 17mm	40
