

Pile Cage Wheel Standard

Efficient Spacing for Reliable Pile Construction

Danterr's standard pile cage wheels provide an efficient and economical solution for maintaining concrete cover in piling applications. Also known as a circular spacer or FastWheel, this rebar spacer wheel is designed for standard reinforcement cages where reliable spacing and ease of installation are essential. Manufactured from durable, recycled materials and compliant with AS/NZS 2425:2015, these cage spacer wheels deliver consistent performance while supporting sustainable construction practices.

Key Features & Benefits

- ▶ **Consistent Concrete Cover** – Maintains accurate spacing for reliable structural outcomes
- ▶ **Lightweight Design** – Easy to handle and install on-site
- ▶ **Versatile Application** – Suitable for a range of reinforcement setups as a circular spacer
- ▶ **Sustainable Material** – Made from 100% recycled plastic, supporting greener construction
- ▶ **Tested & Compliant** – Meets AS/NZS 2425:2015 requirements
- ▶ **Efficient Installation** – Practical spacer wheels for rebar that improve on-site productivity

SPECIFICATIONS:

Code	Description	Bag Qty	Pallet Qty
112521	Standard Pile Cage Wheel 25mm Cover – Lightweight	500	N/A
112522	Standard Pile Cage Wheel 50mm Cover – Standard	100	4000
116698	Standard Pile Cage Wheel 75mm Cover – Standard	40	2160
