

Trench Mesh Support

Secure and Compliant Support for Trench Reinforcement

Danterr's trench mesh supports are engineered to provide stable and consistent reinforcement positioning in trench applications. Featuring a practical clip-on design, these trench mesh spacers can be installed prior to lowering the mesh, improving efficiency on-site. Manufactured from 100% recycled polypropylene and tested to AS/NZS 2425:2015, they ensure reliable concrete cover, minimise movement during placement, and support compliant, high-quality construction outcomes.

SPECIFICATIONS:

Code	Description
102109	Trench Mesh Supports 8-12mm Bar (25pk)
117596	Trench Mesh Supports 16mm Bar (25pk)

Key Features & Benefits

- ▶ **Clip-On Installation** – Side clips allow supports to be fitted before placing mesh, improving efficiency
- ▶ **Secure Positioning** – Keeps trench mesh stable during concrete placement
- ▶ **Standards Compliant** – Meets AS/NZS 2425:2015 requirements
- ▶ **Membrane Compatible** – Flat feet designed for plastic waterproofing film
- ▶ **Optimised Width** – 290mm design avoids interference with trench sides
- ▶ **Durable Construction** – Manufactured from 100% recycled polypropylene for long-term performance
