

**RIGHT REINFORCEMENT.
REAL PROJECT SUPPORT.**

Consistent performance on every pour.

WHY DANTERR

ONE SUPPLIER. COMPLETE REINFORCEMENT SOLUTIONS.

Reliable supply, practical pricing, and support that works on-site.

Danterr works with contractors across Australia to supply high-quality reinforcement materials, delivered on time and backed by dependable service.

We make reinforcement supply simpler by ensuring the right products are available when you need them—reducing delays and keeping your project moving. Our range is widely sourced for projects where structural performance, compliance, and long-term durability matter.

WHY CONTRACTORS CHOOSE DANTE RR

✔ Complete Reinforcement Supply

All key reinforcement materials supplied from one source, reducing procurement complexity and saving time on-site.

✔ Technical Support That Works On-Site

Clear, practical advice and product guidance to help you get the job done right the first time.

✔ Reliable Stock Availability

Materials ready when you need them, helping you avoid delays and keep your project moving.

✔ Practical, Competitive Pricing

Cost-effective solutions without compromising on quality or performance.

✔ Fast, Reliable Delivery Across Australia

Efficient dispatch and trusted freight partners to ensure your materials arrive on time.

BUILT FOR REAL PROJECT CONDITIONS

From civil works to large-scale developments, Danterr supplies reinforcement materials designed for strength, crack control, and long-term durability.

Our products meet Australian standards and perform reliably in real site conditions.

THE RESULT

Less downtime. Simpler procurement. Stronger, more reliable concrete structures.

REINFORCING BARS

Danterr's reinforcing bars provide tensile strength within concrete, supporting load-bearing performance and structural integrity. They are used across footings, slabs, and structural elements to help control cracking and maintain stability.

DEFORMED REINFORCING BAR

Provides reliable tensile strength for reinforced concrete applications. Improves load capacity, supports structural integrity, and helps control cracking across civil and commercial projects.

- Strong bond with concrete for reliable load transfer
- Improves crack control across slabs and structures
- Consistent performance across a wide range of applications
- Complies with AS/NZS 4671

GALVANISED DEFORMED REINFORCING BAR

Designed for projects exposed to moisture and aggressive environments. Provides corrosion protection while maintaining structural strength and long-term performance.

- Corrosion-resistant coating for extended service life
- Maintains structural integrity in exposed conditions
- Reduces maintenance and replacement risk
- Complies with AS/NZS 4671

STAINLESS STEEL DEFORMED REINFORCING BAR

Engineered for high-corrosion environments where durability is critical. Delivers long-term reinforcement performance in marine, chemical, and infrastructure applications.

- Manufactured from 316-grade stainless steel
- Suitable for marine, chemical, and high-exposure environments
- Supports long-term structural durability
- Meets Australian reinforcement standards

REINFORCEMENT SELECTION MATTERS

Choose the right solution for your environment, application, and performance requirements.

Scan to explore the full guide.

REINFORCING MESH

Danterr's reinforcing mesh delivers consistent reinforcement across concrete surfaces, improving load distribution and crack control. It is commonly used in slabs and pavements to support uniform performance and long-term durability.

GALVANISED REINFORCING MESH

Designed to provide reinforced slab performance with added corrosion protection. Suitable for projects requiring durability in exposed conditions.

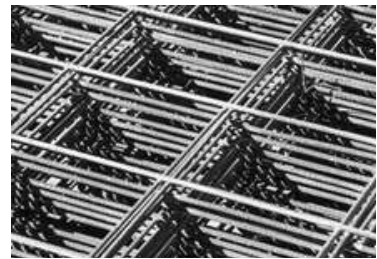

- Protective galvanised finish for corrosion resistance
- Manufactured from 500 MPa welded wire for consistent strength
- Supports consistent slab reinforcement
- Reduces risk of premature deterioration

STAINLESS STEEL REINFORCING MESH

Provides durable reinforcement for concrete slabs in corrosive environments. Improves structural performance while reducing long-term deterioration.

- Excellent corrosion resistance for long service life
- Consistent load distribution across slabs
- Reduces cracking and structural wear
- Complies with AS/NZS 4671

RECTANGLE MESH

Designed for efficient reinforcement across large slab areas. Improves load distribution and supports consistent structural performance.

- Manufactured from 500 MPa welded reinforcing wire
- Improves load distribution across slabs
- Supports crack control in large pours
- Suitable for civil and commercial applications

SQUARE MESH

Provides uniform reinforcement for slabs and pavements. Enhances structural stability and supports long-term durability.

- Even load distribution across concrete surfaces
- Improves crack control in slabs
- Consistent reinforcement placement
- Complies with AS/NZS 4671

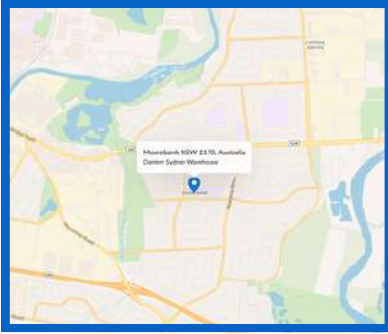

TRENCH MESH

Designed for reinforcing footings, beams, and trench applications. Supports structural continuity and reliable performance below ground.

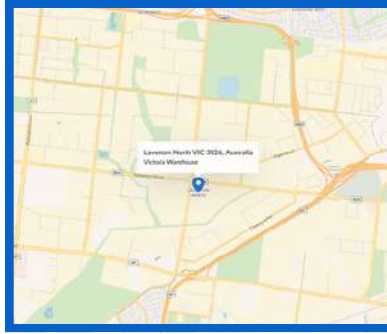

- Designed for footing and beam reinforcement
- Improves structural stability in trenches
- Supports consistent load transfer
- Manufactured from 500 MPa reinforcing steel to AS/NZS 4671

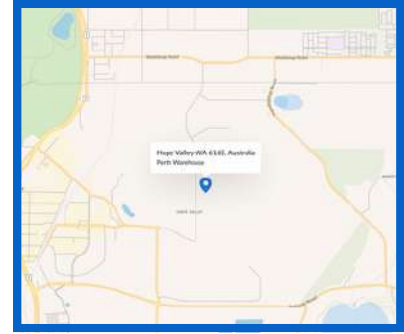

LOCATIONS

SYDNEY WAREHOUSE:
MOOREBANK, NSW

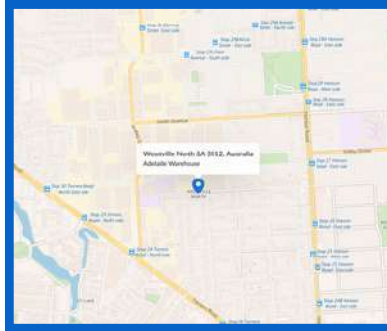

MELBOURNE WAREHOUSE:
LAVERTON NORTH, VIC

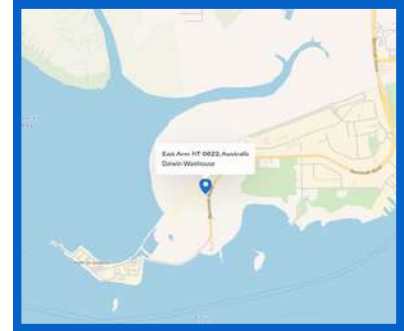

PERTH WAREHOUSE:
HOPE VALLEY, WA

BRISBANE WAREHOUSE:
LYTTON, QLD

ADELAIDE WAREHOUSE:
WOODVILLE NORTH, SA

NORTHERN TERRITORY:
EAST ARM, NT

AUSTRALIA-WIDE SUPPLY. DELIVERED WHEN YOU NEED IT.

Reliable delivery backed by a national network of warehouses and trusted freight partners.

Danterr supports projects across Australia with strategically located warehouses and an efficient delivery network.

We work to get materials where they're needed—on time and ready for use—helping you keep your project moving without unnecessary delays.

BUILT FOR RELIABLE SUPPLY

- ✔ **NATIONAL WAREHOUSE NETWORK**
Multiple locations across Australia to support consistent stock availability and faster turnaround times.
- ✔ **EFFICIENT DISPATCH**
Orders processed quickly and coordinated to meet project timelines.
- ✔ **TRUSTED FREIGHT PARTNERS**
Reliable transport solutions to ensure materials arrive safely and on schedule.
- ✔ **CONSISTENT SUPPLY YOU CAN RELY ON**
A dependable supply chain that helps reduce downtime and keeps your job moving.

SUPPORTING PROJECTS ACROSS AUSTRALIA

From local works to large-scale civil and commercial projects, Danter delivers materials where they're needed—when they're needed.

THE RESULT

Fewer delays.
Better planning.
Materials on-site when it counts.

(*Conditions apply based on stock availability and delivery schedules.)

READY TO GET STARTED?

Let's support your next project with reliable supply and the right materials—delivered when you need them.

Whether you're pricing a job, preparing for an upcoming pour, or looking to streamline your supply, Danterr is ready to help.

Our team works with you to ensure you get the right products, on time, and ready for site.
