

# U-Caps

## Adjustable Screenshot Support for Precise Alignment

Danterr's U-Caps are a versatile screed-support solution designed to deliver accurate, adjustable height control in concrete applications. Engineered to integrate with reinforcement systems, they form part of an efficient screed rail support system, ensuring consistent alignment of screed rails, pipes, and temporary supports. Compatible with M12 ferrule systems and a range of bar sizes, these components provide a reliable and practical solution for controlled, compliant construction outcomes.

## Key Features & Benefits

- ▶ **Adjustable Height Control** – Enables precise levelling using threaded rod and M10/M12 ferrule systems
- ▶ **Versatile Compatibility** – Suits 12mm–20mm reinforcement and threaded rod (optimised for 16mm)
- ▶ **Efficient Screenshot Alignment** – Supports accurate positioning in concrete screed rail supports
- ▶ **Multi-Purpose Use** – Suitable for cables, guard rails, safety screens, and pipe screed support applications
- ▶ **Durable Construction** – Manufactured from UV-resistant HDPP for long-term site performance
