

Concrete Spacer Round with Gal Tie Wire

Durable Round Spacers for Reinforcement Alignment in Civil Applications

Danterr's Concrete Spacer Round with Gal Tie Wire supports reinforcing bar in high-load civil applications, ensuring correct concrete cover and secure placement. Built from fibre-reinforced concrete, the round profile offers improved alignment and consistent cover, while the rust-resistant tie wire keeps the spacer firmly in position, and compliant with AS/NZS 2425.

SPECIFICATIONS:

Product Code	Description
136138	Concrete Spacer Round 30mm With Gal Tie Wire
110985	Concrete Spacer Round 40mm With Gal Tie Wire

Key Features & Benefits

- ▶ Coverage Sizes: 30mm and 40mm
- ▶ Round Profile with Flat Base for improved stability
- ▶ Galvanised Tie Wire for secure placement and corrosion resistance
- ▶ Tapered Design interlocks within the concrete to prevent fallout
- ▶ High Load Rating (60+ MPa) for structural performance
- ▶ AS/NZS 2425 Compliant
