

Concrete Spacer with Clip

Concrete Cover Support for Precast and Infrastructure Applications

Danterr's Concrete Spacer with Clip is a high-performance concrete spacer designed to provide accurate and consistent concrete cover in precast, civil, and infrastructure projects. Manufactured from cast concrete, it delivers superior load capacity, corrosion resistance, and a homogeneous bond with surrounding concrete to maintain structural integrity. Engineered for rapid installation and long-term durability, it ensures reliable reinforcement positioning while meeting the demanding requirements of modern construction.

SPECIFICATIONS:

Product Code	Description	Size
131143	Concrete Spacer with Clip	40mm
129393	Concrete Spacer with Clip	50mm

Key Features & Benefits

- ▶ **Corrosion-Resistant** – Cast concrete construction protects reinforcement and enhances long-term durability.
- ▶ **Guaranteed Concrete Cover** – Ensures precise and consistent spacing for compliant reinforcement placement.
- ▶ **Homogeneous Concrete Bond** – Bonds seamlessly with surrounding concrete, eliminating gaps and reducing the risk of hairline cracking.
- ▶ **No Heat or Cold Deformation** – Cement-bound material expands and contracts at the same rate as the concrete structure.
- ▶ **Fast Clip-On Installation** – Improves productivity and reduces installation time compared to traditional tie-wire fixing methods.
- ▶ **Fire-Resistant** – Manufactured to meet high fire-resistance requirements for enhanced structural safety.
