# Concrete Rail Spacers - Triangle

## Reliable Alignment & Strength for Slab and Formwork Reinforcement

Danterr's Concrete Rail Spacer – Triangle is a high-strength, fibre-reinforced spacer designed for accurate rebar placement in walls, beams, and slabs. Its triangular profile provides secure grip and consistent cover, ensuring stable reinforcement during concrete pours. Available in 330mm and 1000mm lengths with cover sizes from 25mm to 100mm, it meets AS 2425:2015 standards and performs reliably under heavy loads and harsh conditions.

## Key Features & Benefits

- **Fibre-Reinforced Strength:** Long-lasting performance under high loads
- **Triangular Profile:** Prevents rolling and maintains consistent cover
- **Wide Size Range:** Covers from 25mm to 100mm Length Options: Available in 330mm and 1000mm lengths
- **Bag Flexibility:** Supplied in bulk quantities for civil-scale use
- **Weather & Chemical Resistance:** Withstands site exposure
- **AU/NZ Compliant:** Meets AS 2425:2015 requirements for concrete spacers
