

Form Tie Plugs

Advanced Water-Swellable Sealing for Formwork Spacer Waterproofing

Danterr's Form Tie Plug is an engineered sealing solution designed to provide a permanent watertight seal for form tie holes and formwork spacers in concrete structures. Featuring a water-swelling thermoplastic rubber cap and a high-strength polyamide core, it expands on contact with moisture while providing secure mechanical fixation. Certified to withstand water pressure, it delivers reliable concrete waterproofing for civil, commercial, and infrastructure applications.

Key Features & Benefits

- ▶ **Watertight Seal** – Effectively seals form tie holes and spacers to prevent water ingress.
- ▶ **Water-Swellable Design** – Thermoplastic rubber expands to maintain a durable seal.
- ▶ **Impact-Resistant Core** – Polyamide core provides secure mechanical fixation.
- ▶ **Fast Installation** – Installs with a single hammer blow.
- ▶ **No After-Treatment** – Eliminates additional finishing after installation.
