

Form Tie Rings & Connectors

Engineered Waterstop Protection for Form Tie and Spacer Penetrations

Danterr's Form Tie Rings & Connectors are engineered waterstop components designed to seal form tie rods and formwork spacer penetrations in concrete structures. Manufactured from water-swellable hydrophilic rubber, they expand on contact with moisture to create a durable water seal that helps prevent water ingress through concrete cracks and tie rod penetrations. Certified to withstand water pressure up to 6 bar, they provide reliable waterproofing solutions for civil, commercial, and infrastructure applications.

SPECIFICATIONS:

Form Tie Rings

Code	Description	Pack Qty
112199	Waterstop Form Tie Sealing Ring 20 x 2mm	200
112200	Waterstop Form Tie Sealing Ring 24mm	100
112201	Waterstop Form Tie Ring UFO 12mm	100
110043	Waterstop Form Tie Ring UFO 17mm	100
110455	Waterstop Form Tie Ring UFO 24mm	100
112202	Waterstop Form Tie Ring UFO 31mm	50
112203	Waterstop Form Tie Ring UFO 39mm	50

Form Tie Connectors

Code	Description	Pack Qty
112204	Waterstop Form Tie Sealing Connector 15mm	50
112205	Waterstop Form Tie Sealing Connector 20mm	50
112206	Waterstop Form Tie Sealing Connector 23mm	50
112207	Waterstop Form Tie Sealing Connector 26mm	50
112208	Waterstop Form Tie Sealing Connector 30mm	50

Key Features & Benefits

- ▶ **100% Waterproof** – Prevents water ingress around spacers and tie rods.
- ▶ **6 Bar Certified** – Tested for reliable waterproofing performance.
- ▶ **Hydrophilic Rubber** – Expands to form a durable water seal.
- ▶ **Engineered Design** – Delivers dependable sealing in concrete structures.
- ▶ **Easy Installation** – Quick to assemble with minimal site effort.
- ▶ **Versatile Compatibility** – Suitable for various spacer and tie rod sizes.
- ▶ **Civil & Infrastructure Ready** – Ideal for structures requiring long-term waterproofing membrane performance.
