

Polybar+

High-Performance Construction Joint Sealing for Long-Term Waterproofing

Danterr's Polybar+ Hydrophilic Waterstop Strip is a high-performance sealing solution designed to waterproof construction joints in concrete structures. Manufactured from thermoplastic synthetic rubber, this swellable hydrophilic waterstop expands on contact with water to create a durable seal that helps prevent water seepage. Successfully tested to withstand water pressure up to 8 bar, Polybar+ provides reliable concrete waterproofing across civil, commercial, and infrastructure applications.

Key Features & Benefits

- ▶ **High Expansion Capacity** – Forms an effective seal against water ingress.
- ▶ **8 Bar Certified** – Tested for demanding waterproofing applications.
- ▶ **Wet-Dry Cycle Stability** – Maintains performance after repeated exposure.
- ▶ **Washout Resistant** – Remains effective during concrete placement.
- ▶ **Lightweight & Flexible** – Easy to handle and install on site.
- ▶ **Reliable Joint Protection** – Delivers long-term sealing for waterstop expansion joint applications.

SPECIFICATIONS:

Product Code	Description
134682	Waterstop Polybar+ 16mm x 4mm x 10m Roll
134689	Waterstop Polybar+ 10mm x 4mm x 10m Roll
140311	Waterstop Polybar+ 20mm x 20mm x 5m Roll
140334	Waterstop Polybar+ 20mm x 30mm x 5m Roll
