Sacraform™

Sacrificial Formwork for Stronger, Cleaner Concrete Foundations

Sacraform™ is a stay-in-place sacrificial formwork system designed for fast, efficient, and clean foundation construction. It is manufactured from durable high-tensile steel mesh covered in a heavy-duty heat-shrunk polyethylene film. This dual-material construction delivers strong, stable, and lightweight permanent formwork support suitable for a wide range of applications. Sacraform™ helps reduce labour, minimise material waste, and shorten overall project time while maintaining a clean, professional work environment.

SPECIFICATIONS:

Product Code	Description
103655	Sacraform Sheet 600mm x 2250mm
103658	Sacraform Sheet 900mm x 2250mm
113842	Sacraform Sheet 1200mm x 2250mm
113843	Sacraform Sheet 1500mm x 2250mm
103654	Sacraform Sheet 1800mm x 2250mm

Key Features & Benefits

- **Stay-in-place design:** Removes the need for stripping, saving labour and time.
- **Durable steel mesh:** Dual-sided plastic for strong and stable formwork performance.
- **Lightweight:** Easy to handle, supporting quick installation on site.
- **Versatile:** Use for footings, ground beams, cages, penetrations, and screening needs.
- **Flexible construction:** Can be bent or shaped for custom applications.
- **Reduces material waste:** Supporting more sustainable construction practices.
