VoidX™ Cardboard Sheets

Degradable Void Forming for Slabs, Beams, and Expansive Soil Conditions

Danterr's VoidX™ Cardboard Sheets are lightweight, degradable cardboard void formers designed to create separation between reactive soils and concrete foundations. Featuring a durable honeycomb cardboard core, these sheets support wet concrete during placement before gradually breaking down to form a void that accommodates soil expansion. Engineered for efficient installation, they provide a reliable concrete void former solution for commercial and civil construction projects.

Key Features & Benefits

- **Accommodates Ground Movement** – Creates space for soil expansion, reducing pressure on foundations.
- **High Load Capacity** – Supports wet concrete during placement and curing.
- **Honeycomb Construction** – Provides reliable strength with minimal weight.
- **Lightweight & Easy to Install** – Simplifies handling and positioning on site.
- **Cost-Effective Solution** – Reduces handling and installation effort.
- **Recyclable Material** – Made from recyclable cardboard for more sustainable construction.
- **Versatile Applications** – Suitable for slabs, ground beams and civil foundations.

SPECIFICATIONS:

Code	Description
112341	VoidX™ Cardboard Sheet 2400mm x 1200mm x 25mm
108302	VoidX™ Cardboard Sheet 2400mm x 1200mm x 50mm
108303	VoidX™ Cardboard Sheet 2400mm x 1200mm x 75mm
108477	VoidX™ Cardboard Sheet 2400mm x 1200mm x 100mm
108478	VoidX™ Cardboard Sheet 2400mm x 1200mm x 150mm
